

The information in this diary is not intended to replace the advice of your Diabetes Specialist Nurse or Doctor.

This item has been developed and funded by Sanofi.

## introduction

If you want to keep up with the Diabeasties, you need lots of energy! That's why it's important to make sure you take your insulin medicine every day, just the way your Diabetes Specialist Nurse or Doctor showed you.

If you're like me, you probably want to do lots of things every day, and it can be hard to remember everything. So this diary can help you stay on track!

This is also a great place to write down anything else that has happened that day, like feeling tired, poorly, or feeling really full of energy!

Use this diary to write down your blood sugar levels - that way you can see if it changes. And if you ever need to change your insulin dose, you can make a note of that too.

Writing everything down can really help you understand how your medicine is helping you, and you can show it to your Diabetes Specialist Nurse or Doctor so

keep on track, and stay healthy!

When you see your Diabetes Specialist Nurse or Doctor, they will check how your diabetes is getting on, and make sure you're well.

They will tell you the best times to check your blood sugar levels, and show you how to do it, to make sure there's not too much or too little sugar in your blood.

It's very quick and easy to check, and it helps to find out how well your medicine is working. This can help stop you from getting a 'hypo' or a 'hyper'.

What is a 'hypo'?
A hypo is when you have too little sugar in your blood. This can make you feel very tired or poorly. If this happens, you need to eat something sugary as soon as you can.

What is a 'hyper'?
A hyper is when you have too much sugar in your blood. You might feel thirsty and need the toilet a lot. This means that you need more insulin.
